MR. INGALLS ON FINANCES.

THE KANSAS EX-SENATOR TALKS PLAINLY ON THE OUTLOOK.

Wise Statesmanship Will Alone Avert Grave Trouble—Fair Free Silver Coinage Proposed—The Democracy Not to Blame for the Situation.

TOPEKA, June 29.—Ex-Senator Ingalls, who spent a few hours in the city yesterday, thinks the country is on the brink of financial peril and only wise statesmanship will avert it. Asked the cause of the trouble, he said it was incidentally a lack of confidence among the people and primarily scarcity of money and a largely increased debtor class. The action of India in demonetizing silver was unfortunate just at this time. A restoration of confidence would turn the tide and the free coinage of silver dollars at more nearly the value of gold than the present standard would in a measure bring the country back to prosperity.

Mr. Ingalls does not subscribe to the Republican theory that the financial stress is due to the accession of the Democrats to power. He says President Cleveland and his cabinet are running the finances of the country under laws passed by the Republicans, and to shift the responsibility without a single act of legislation by the Democratic congress is absurd. To his notion President Cleveland is a Republican to all intents and purposes, save in his tariff ideas, and so far he has shown himself to be a pretty good Republican on that question.

THE SOUTH WANTS ACTION.

Leading Papers and Business Men Against the Sherman Law—A Colorado View.

WASHINGTON, June 29.—Most of the radical silver men here declare that they are more determined than ever to maintain the white metal as a money standard. They speak of it as a conspiracy and declare that they will fight fiercely to prevent the further degradation of silver. Moderate silver men are not with them, however.

Reports from the South are that the leading newspapers and business men are overwhelmingly in favor of the repeal of the Sherman act and favor prompt action by congress. The business men of Atlanta, Ga., have sent a petition to the President asking him to call congress without delay so as to secure the early passage of a bill repealing the Sherman law.

An intimate friend of the Secretary of the Treasury said yesterday that according to Mr. Carlisle, a canvass of the members of congress had been made two months ago in behalf of Mr. Cleveland, with the result that it was learned that there was a majority of the house in favor of the repeal of the Sherman silver purchase law, but that in the senate there was a majority of twenty the other way. It is believed, however, that enough senators (eleven at least) would be converted before September to enable a repeal measure to be passed in the upper house.

Secretary Carlisle received a cable stating that the price of silver was to-day 68½ cents in London at which rate the silver dollar as

ore contracts on hand which will keep them in operation until January 1, no difference what the price of silver may be.

TELLER RATHER HOPEFUL.

The Colorado Senator Takes a Calm View of the Action of India.

DENVER, Col., June 29.—Senator Teller this morning said: "The action of India ought not to have depressed silver to the extent that it seems to have done and I think the fall in silver has resulted largely from a misapprehension on the part of the people of the East as to what action the Indian government will take. I noticed in the papers of Tuesday that Mr. Leech and Mr. Cannon are reported as saying that India will cease to take silver. The fact is, if the mints are closed to private coinage it is the intention of India to purchase silver and coin it on account of the government in the same manner, practically as we coined under the Bland act, and there is no reason to suppose India will not take as much silver in the next year as it took in the last. Many friends of silver believe that that will enable the India council to sell its council bills at a stipulated and fixed price and thus prevent the fluctuation of silver. Now, if council bills are to be sold, as the press representatives say the scheme is, at one shilling and four pence per rupee, which is more than they have been selling at heretofore for some time, it ought to make silver not only more stable, but higher than it has been for the last ten days. There is no possibility of India having a gold standard with gold as the circulating medium. It is impossible for them to do that. The British government twice tried that and it has failed. The statement made in the public press that they propose to give a gold standard without a gold currency means that they propose to take the rupee on a gold basis as to its value considered as bullion; in other words, they would take the rupee, instead of at forty-seven cents, its mint value, at thirty-two cents, which would be about its gold value. I do not consider the action of the India government as alarming as the alarmist people seem to think it is, nor do I believe that it will aid in the repeal of the Sherman bill."

HELENA, Mont., June 29.—Ex-Governor Hauser, chief owner of the Helena smelter, which is turning out about \$300,000 in silver bullion every month, says it will not close, as there is enough gold and lead in the ores of Montana to keep it running in spite of low prices of silver. He says the present situation will cause reaction in favor of silver. Every silver mine that closed down reduced the production of gold from 25 to 40 per cent. The result would be the contraction of the gold product to less than 65 millions per annum, an amount which is consumed every year in the arts alone. Money would become scarce, gold go to a premium and this scarcity would compel an increased use of silver. Mr. Hauser thinks the next congress will repeal the Sherman law and pass a law for the coinage of 3 or 4 millions of silver per month on an increased ratio. Hauser is one of the largest mine owners in Montana.

to enable a repeal measure to be passed in the upper house.

Secretary Carlisle received a cable stating that the price of silver was to-day 68 1/2 cents in London at which rate the silver dollar as bullion was worth 53 cents. Nevertheless the point was, of course, apparent that the purchasing power of silver dollar with silver bullion at 68 1/2 per ounce was as great to-day as it was when silver was worth \$1.22 per ounce and the bullion value of the silver was 93 cents. It should be equally obvious that this is so because the credit of the United States is behind its silver money as it is behind all of its other forms of money and without which none of them except gold coin and gold certificates would be worth their par value in the money markets of the world. This fact was several times emphasized at the last session of congress when ex-Secretary Sherman and others repeatedly declared during the senate debates that there was in the treasury the bullion gold value of every silver certificate issued by the government.

DENVER, Col., June 29.—A prominent member of the Clearing House association, in speaking of the silver situation, said: "The closing of the mints to silver coinage in India will precipitate the settlement of the silver question, and viewed from this point it is not to be regretted. It will not weaken the cause of silver, nor will it shake the confidence of the friends of free coinage in ultimate success. The money changers have but one more point to gain and that is to secure the repeal of the Sherman silver act. With that accomplished every impediment that they have declared obstructed the paths of prosperity will have been swept away, and general relief to the people of the whole world will be the prompt and immediate result. Instead of this, however, universal ruin and bankruptcy will follow and the people will take the remedy in their own hands, and that remedy will be of the heroic order. It may well be doubted if it would be good policy to oppose the repeal of the Sherman act any further. The friends of free coinage will gain rather than lose by acceding to the last demand of the monometalists, for there will then no longer be any room for controversy. There being no money other than gold, and it being controlled by comparatively few, it will only be employed to extort usurious interest for its use from those who must submit or be ruined. It does not require the wisdom of a prophet to foretell the result of such a condition. Ninety-five per cent of the people of the earth will then be made to thoroughly appreciate their relation to the remaining 5 per cent, and they will proceed to equalize things. Just what course they will pursue remains to be seen. It will probably not be a pathway of roses for the currency contractors, but they have courted the storm and they may as well prepare for the cyclone. We have long passed the era of the dark age. The world has grown in intelligence and the enslavement of the masses is no longer possible. Repeal the Sherman act and not only the people of the United States, but of the whole earth, will demand a return to the free and unlimited coinage of silver and they will obtain what they demand. It is more than possible that the shortest way to bi-metallicism is through the fiery furnace of ruin, certain to follow the completion of the conspiracy against silver."

SILVER MINES CLOSING.

Low Price of the White Metal Causing General Cessation of Work.

ASPEN, Col., June 29.—A majority of the mines in this camp have practically closed down. Yesterday the Mollie Gibson laid off every man except a few pump men and engineers. The following properties have

LOAN RATES VERY HIGH.

New Yorkers Forced to Pay Dearly for Call Money—Silver Again Tumbles.

NEW YORK, June 29.—The rates for call loans to-day reached the highest figure since the present stringency set in. Rates rose to 3 1/2 per cent per diem and interest equal to about 141 per cent per annum. The pinch was particularly severe this morning. Efforts were made to have the clearing house banks take out large amounts of loan certificates in order to tide over the first of the month, the critical period, and they proved successful, as the banks asked for and the loan committee used \$6,300,000 certificates, the largest amount for many a day thus far. The total outstanding is \$13,330,000. This relieved the market and there was a rally to 20 per cent. Dealings in time money and mercantile paper were practically at a standstill.

The stringency in money demoralized the sterling exchange market and the selling rates again fell below the gold importing points. Bankers were liberal sellers of bills in order to take advantage of the higher rates for money.

The drop of silver in London to 31 1/4 d per ounce demoralized the market for the metal here. At the Stock Exchange silver certificates broke from 68 1/4 to 62, while outside of the board commercial bar silver fell to 62 and Mexican dollars to 55.

Up to 2 o'clock not a sale was reported in the mining department of the New York stock exchange. At the Consolidated exchange the trading as usual in mining stocks was light, but prices were nominally 10 to 20 per cent lower all along the line.

Dealers say that transactions in government bonds have been on an enormous scale recently. One authority estimates the sales for the past fortnight by savings banks and kindred institutions at about 4 million dollars. National banks were the purchasers and full prices were paid in every instance.

India's Banks May Be Protected.

SIMLA, June 29.—The Indian government is discussing the claims of the various banks which have 1 1/2 million pounds in silver on passage to India and which want compensation for the depreciation in the value of the metal arising from the action of the government in stopping free coinage. It is said that the government is inclined to secure the banks against loss.

MURDEROUS BANDITS FAIL.

Texas Train Robbers Kill a Fireman—The Conductor Runs Down the Leader.

SAN ANTONIO, Tex., June 29.—When the San Antonio & Aransas Pass passenger train from here reached Breckinridge, thirty miles from here, about 2 o'clock yesterday afternoon, three men boarded the front of the baggage car, and soon after the train started again one of the men climbed over the locomotive tender, revolver in hand, and ordered the engineer and fireman to hold up their hands.

Engineer Michael Tierney obeyed, but Fireman Martin made a motion as though he was about to secure a revolver. The robber fired every bullet from a heavy six-shooter into his body, killing him. The corpse fell from the cab under the wheels and was ground to pieces.

The other two robbers jumped from the train and fled as soon as they saw what their leader had done. The twelve passengers on the train
