Anathematize her as the Republicans may, Missouri has done more for the negro than most of her sister States. This has been partly due to the fact that Missouri's colored population has been larger than that of other States except those of the extreme South, and her opportunities consequently greater. Not only in Lincoln institute and the great number of public schools established for the race throughout the State, but in thousands of private homes have the negroes been educated. The best proof of the efficiency of the system employed is in its success.</p> <p>Through the process of schooling that he has undergone, the Missouri negro has become in the last few years a changed creature. He is more of a man and less of an animal. Prejudice, when it comes to Missouri, must admit that we have here the most intelligent, progressive and self-reliant colored population in the country. Therefore, when Lincoln institute shall hold its annual commencement this week, and its intelligent girls and boys are sent out into the world, let them be taught that they are Missourians, products of a Missouri system, and expected to honor Missouri in leading their thousands of fellow-beings to a higher plane of civilization than they have ever reached before.</p> <p><u>THE most dangerous man of the day is the</u></p>	<p> the f rison Spant ported That Color Presi they He m bid tl atten can e publi whet Eller with pire.
