

A PANIC AVERTED!

Crim disaster's crushing hand brings a tidal wave of bargains to your feet. When supine opposition sits idly down moaning its sad prospects and the breakers ahead, we put forth herculean efforts to secure what you need at prices that will harmonize with hard-time purses. That's why we float on the top wave of prosperity, while others sink, borne down by the deadly weight of their own lack of enterprise.

MEN'S SUITS.

More here now than when the season opened. A carnival of most magnificent beauties marked at 40c on the dollar or what it cost the maker to produce them. Better ones don't exist, lower prices never were seen. Hard times prices for such articles as you now need, with no broken stock to choose from, but a huge, bright, clean, fresh, pretty and serviceable assortment of the most commendable goods on the market. One of the Main street windows is full to repletion and one look will convince you that fashion and economy are linked more tightly together than ever before in the history of trade.

KNEE PANTS SUITS.

By the beard of the prophet but they're glorious. Productions regal in make and material; pauper in price. Prices that will make your head swim—prices made with but one object in view—prices that'll take the last one of these suits away long before the end of fly time. Look in the Main st. window you'll see them—the window with a broken Glass. The glass went to pieces as soon as the price tags were placed on the goods—and if it acts that way on glass, how do you think it'll work on your pocketbook?

LONG PANTS SUITS.

The scythe of old Father Time never worked sadder havoc than the knife of reduction in its furious hard-time onslaught! To the right, to the left, in front and in rear, you'll find a matchless array of magnificence—and you'll find it kept from you by so slight a thread of price that you'll wonder what'll come next. Take the goods—the goods offer, take them at 40 per cent of their value, but take them and be happy. One of the Main Street windows will show you the styles and makes—the prices are too low to convey a proper idea of them.
