

There is a chance of the Winner bridge at Kansas City, which has been such a loss, being converted into a toll bridge. It will be a winner if it is.---  
Leavenworth Times.

Than you, Anthony. You seem unusually generous in recommending a bridge which will take Missouri business away from Leavenworth, but you think "Damn it;" and you know the tolls will dam the tide of traffic, and turn it your way. But tolls or no tolls, the bridge should be built. If with tolls, then there should be a proviso that the bridge [may] be made free by the residents of a huge benefit district paying for it at an option.
