THE KANSAS CITY & NORTHERN.

The Surveyors Running a Line from Plattsburg to the Winner Roadbed.

LIBERTY, Mo., Dec. 31.—The surveyors of the Kansas City & Northern Connecting railway are again at work, and are running a line from Plattsburg, via Carpenter, to the Winner roadbed, north of Smithville. Track was laid on the Winner road to Smithville, but the roadbed was built several miles beyond that point. The present survey by the new company tends to confirm the report that it has purchased or arranged for the use of the Winner road. It is stated that if such an arrangement has been made, the Winner bridge at Kansas City may not be used, but the Milwaukee bridge at Randolph. Only about a mile of track would have to be built from the Winner road to the Milwaukee bridge. A large tract of land has been purchased by the Kansas City & Northern for a townsite nine miles north of Plattsburg.

Spain's Negotiations.
